

YASH PATIL

Java Backend Developer

Phone: +91-9022046356 yashpatil2571@gmail.com [LinkedIn](#) [GitHub](#)

Summary

Java Backend Developer with hands-on experience building scalable microservices and RESTful APIs using Spring Boot. Proficient in JWT-based authentication, external API integration, and layered architecture design. Strong foundation in relational database modeling, OOP principles, system design, and data structures & algorithms.

Education

B.Tech. in Information Technology
G.H. Raisoni College of Engineering, Pune

Aug 2023 – May 2027
CGPA: 8.18 / 10

Skills

Languages: Java, SQL, JavaScript
Frameworks: Spring Boot, Spring Security, Spring Data JPA, Hibernate
Web Technologies: HTML, CSS, REST APIs
Tools: IntelliJ IDEA, Maven, Git, GitHub, Postman

Virtual Experience

J.P. Morgan Chase & Co. – Software Engineering Virtual Experience **Jan 2025 – Ongoing**
Forage (Virtual Program)

- Completed a job simulation focused on back-end development using Java and Spring Boot.
- Integrated Apache Kafka for asynchronous message processing between 2 independent services.
- Implemented 4+ REST API endpoints and controller layers to expose backend functionality to consumers.
- Modeled and persisted 3+ relational entities using Spring Data JPA with an H2 in-memory database.

Projects

CineReserve – Movie Ticket Booking Backend | *Java, Spring Boot, MySQL, JPA/Hibernate, JWT* **Jan 2026**

- **Designed and built a modular RESTful backend** for movie ticket booking using Controller–Service–Repository layering, achieving clean separation of concerns across 10+ entities.
- Enforced stateless authentication and role-based authorization using Spring Security with JWT token validation, securing all user-facing and admin endpoints.
- Built and exposed REST APIs for movie management, show scheduling, seat selection, and booking workflows with real-time seat availability validation.
- Structured and normalized the relational database schema to support concurrent booking transactions and user management with minimal redundancy.

ShopSphere – Microservices E-Commerce Backend | *Java, Spring Boot, Spring Cloud, JWT* **Ongoing**

- **Engineered a microservices-based e-commerce platform** with 5 independent services: user management, product catalog, order processing, payment, and notifications.
- Configured an API Gateway with load balancing and intelligent routing, enabling seamless inter-service communication and centralized client request handling.
- Applied Spring Security with JWT-based stateless authentication and role-based access control differentiating Admin and User permissions across all services.
- Provisioned service-specific databases and maintained cross-service data consistency using transactional and event-driven messaging mechanisms.

Awards & Certifications

- **Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate** – Oracle University | Issued Oct 2025 | Credential ID: 3232586990CI25AICFA
- **DSA & Competitive Coding** – Solved 100+ problems across different platforms including [LeetCode](#), covering a wide range of topics and difficulty levels.
